Dear Westchester Power Customer,

**RE: Constellation NewEnergy, Inc. New York Environmental Disclosure for 2018**

*You are receiving this letter because you received electricity supply from Constellation through the Westchester Power Community Aggregation program in 2018. These reports are purely informational and do not indicate a change to your current contract or require any action.*

Enclosed are:

1. The New York State Environmental Disclosure Report

This report includes Constellation NewEnergy, Inc.'s entire customer base in the State of New York, and so is not specifically representative of Westchester Power or your individual supply. We are mandated by New York State to send this to all of our customers.

2. The Westchester Power Green-e National Wind historical product content label for calendar year 2018

This report is specific to the renewable energy certificates associated with your supply under the Westchester Power program during the indicated period.

The scope of these two reports is completely different, and we therefore often get inquiries from customers who wonder why the NYS Environmental Disclosure Report does not seem to match their renewable energy purchase under the Westchester Power program. Please be assured that the Green-e report gives an accurate accounting for your renewable energy purchase.

If you have any questions, please contact Sustainable Westchester at (914) 242-4725 or [info@westchesterpower.org](mailto:info@westchesterpower.org)

Thank you,

Constellation and Sustainable Westchester

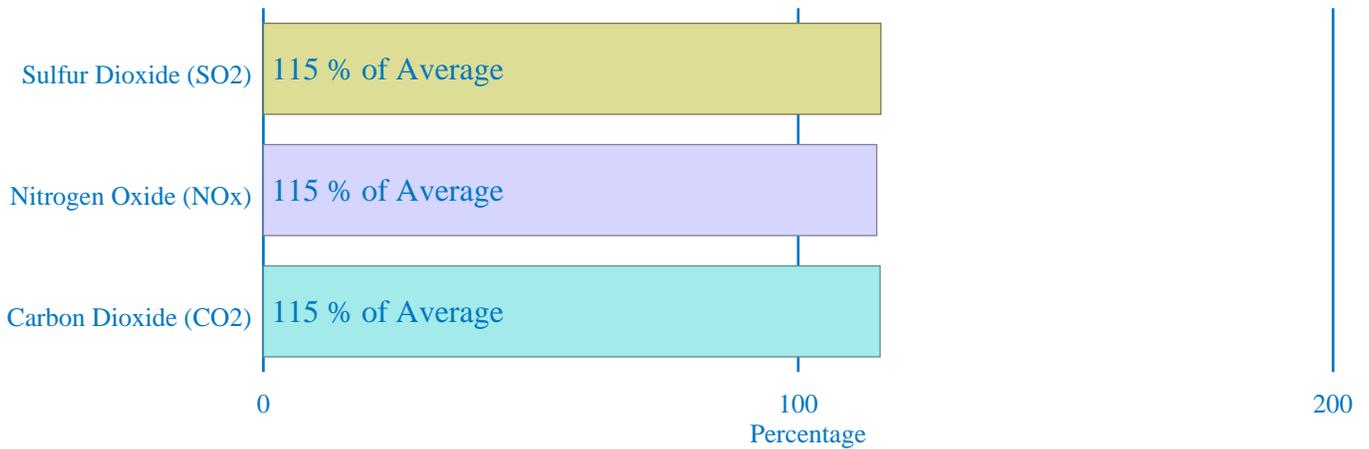

### Fuel Sources

Biomass	< 1 %
Coal	3 %
Hydroelectric	9 %
Natural Gas	42 %
Nuclear	39 %
Oil	< 1 %
Renewable Biogas	< 1 %
Solar	< 1 %
Solid Waste	2 %
Wind	3 %

Total ..... 100 %

(Total may vary slightly from 100% due to rounding)

### Air Emissions Relative to the New York State Average

**Note:** Sulfur dioxide and nitrogen oxides are key pollutants that contribute to acid rain and smog, and carbon dioxide, contributes to global climate change. Depending on fuel source, size, and location, the generation of electricity may also result in other public health, environmental and socio-economic impacts not disclosed above.

This label displays information on the electricity provided to all customers of this entity. If necessary, product specific labels can be generated by the entity.

**2018 HISTORICAL PRODUCT CONTENT LABEL<sup>1</sup>**

NewMix® Wind is a Renewable Energy Certificate (REC) product and does not contain electricity, which may be billed separately or by a separate company. A REC represents the environmental benefits of 1 megawatt hour (MWh) or renewable energy that can be paired with electricity. For more information, see [www.constellation.com/ny-somers](http://www.constellation.com/ny-somers)

NewMix® Wind matches 100% of your electricity usage. In 2018, NewMix® Wind was made up of the following renewable resources.

Green-e Energy Certified New <sup>2</sup> Renewables in NewMix® Wind		Generation Location
-Wind	100%	Iowa
<b>TOTAL</b>	<b>100%</b>	

1. These figures reflect the resource mix of the RECs delivered to NewMix® Wind's customers in 2018.

2. New Renewables come from generation facilities that first began commercial operation within the past 15 years.

For comparison, the New York State Electric and Gas 2017 mix of energy sources includes: Coal (3%), Nuclear (36%), Oil (less than 1%), Natural Gas (40%), Hydroelectric (14%), Biomass (less than 1%), Renewable Biogas (less than 1%), Solar (less than 1%), Solid Waste (2%), and Wind (3%). (from NYGATS)

The average home in the United States uses 867 kWh per month. [Source: U.S. EIA, 2017]

For specific information about this REC product, please contact Constellation NewEnergy, Inc., 866-691-6417, [home@constellation.com](mailto:home@constellation.com), [www.constellation.com](http://www.constellation.com).

NewMix® Wind is Green-e Energy certified and meets the environmental and consumer-protection standards set forth by the non-profit Center for Resource Solutions. Learn more at [www.green-e.org](http://www.green-e.org).
